Req Comment:	Description: At the street, the culvert has holes that are obviously very deep. You can see straight down. This scares me for several reasons, 1) because anytime we put bulk garbage items at the street (such as old furniture, old fencing, post etc) people drive their vehicles and walk in this area to get what they want due to it being such a busy street and this worries me that it will cave in more and hurt the people and/or their vehicles on the property, 2) while mowing the grass it's scary to not hit these areas as some are difficult to see when the grass is taller.
